Keyword Competition vs Expected July Search Volume

Keyword Competition is a function of demand, number of existing sellers in the market and average sales. Search volume is the number of searches on an average per month. This graph depicts how competitive the keywords with respect to the number of people that are searching for it.

Number Of Products Indexed vs Keyword Competition

Keyword Competition is a function of demand, number of existing sellers in the market and average sales. Number of products indexed is the total number of products indexed on Amazon for a specific search term. This graph depicts how competitive the keywords with respect to the number of products indexed for it.
